

HR Analytics Dashboard

Employee Attrition Analysis

Project Overview

Comprehensive Power BI dashboard analyzing 1,480 employees with 16.28% attrition rate. Key finding: Overtime workers have 31.19% attrition vs 10.38% for non-overtime employees.

Business Problem

16.28% attrition rate (241 employees lost) | \$3.6M-\$6M annual replacement costs | HR at 26.83%, Sales at 25.23% attrition

Dataset Summary

Total Employees	1,480
Lost	241 (16.28%)
Retained	1,239 (83.72%)
Features	37 attributes

Key Findings

- * Overtime Impact: 31.19% attrition (3x higher than baseline)
- * HR Department: 26.83% attrition (Highest)
- * Sales Department: 25.23% attrition (Second highest)
- * Compensation Paradox: Higher earners show equal/higher attrition

Strategic Recommendations

- ✓ Implement overtime management (10-15 hrs/month limit)
- ✓ Department-specific retention programs for HR & Sales
- ✓ Work-life balance and wellness initiatives
- ✓ Career development and mentorship programs
- ✓ Quarterly retention monitoring and tracking

Success Targets

- Overall attrition: 16.28% → <10% (12 months)
- Overtime attrition: 31.19% → <15% (6 months)
- HR attrition: 26.83% → <15% (6 months)
- Retention rate: 83.72% → >90% (12 months)
